

RATCHET TIE DOWN

CAPACITY 2500KG

PART NO. RTD055ERGO

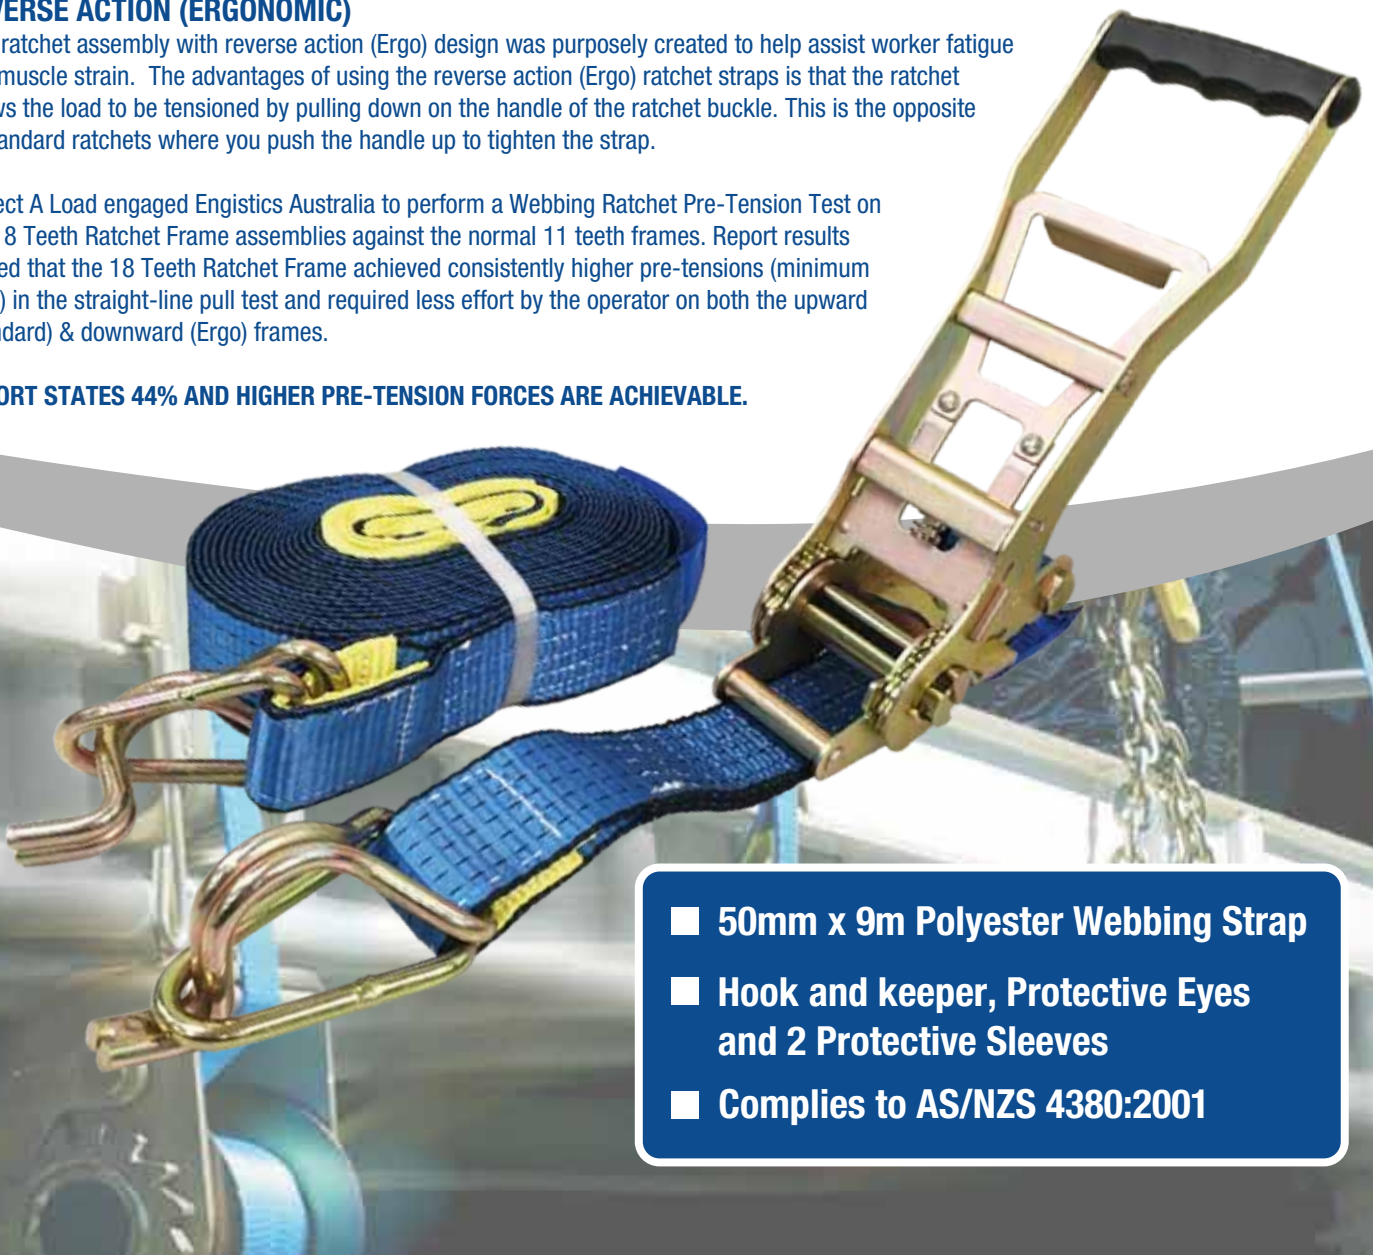

ERGO HANDLE 330mm HEAVY DUTY 18 DUAL TEETH

REVERSE ACTION (ERGONOMIC)

This ratchet assembly with reverse action (Ergo) design was purposely created to help assist worker fatigue and muscle strain. The advantages of using the reverse action (Ergo) ratchet straps is that the ratchet allows the load to be tensioned by pulling down on the handle of the ratchet buckle. This is the opposite to standard ratchets where you push the handle up to tighten the strap.

Protect A Load engaged Engistics Australia to perform a Webbing Ratchet Pre-Tension Test on the 18 Teeth Ratchet Frame assemblies against the normal 11 teeth frames. Report results proved that the 18 Teeth Ratchet Frame achieved consistently higher pre-tensions (minimum 44%) in the straight-line pull test and required less effort by the operator on both the upward (standard) & downward (Ergo) frames.

REPORT STATES 44% AND HIGHER PRE-TENSION FORCES ARE ACHIEVABLE.

- 50mm x 9m Polyester Webbing Strap
- Hook and keeper, Protective Eyes and 2 Protective Sleeves
- Complies to AS/NZS 4380:2001
