

Heatleys eBusiness Solutions Through PunchOut

Heatleys eBusiness solutions offer customer multiple methods of engaging digitally and purchasing safety and industrial items from our website.

How does PunchOut work?

PunchOut is the purchasing method where a customer will buy from the Heatleys website that is linked direct with their ERP system.

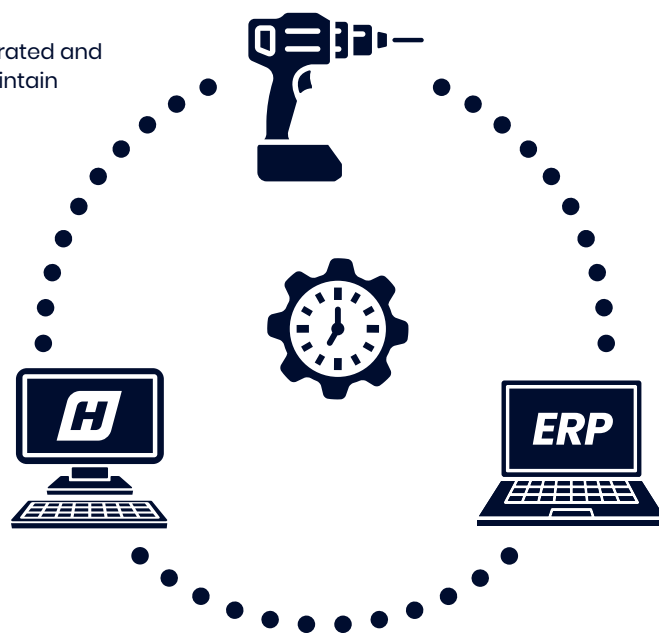

Under a PunchOut arrangement, business customers will have access to Heatleys products from a pop-browser in their own ERP system.

You can add items to your shopping cart which are then transferred back to the ERP system for the order to be created.

Once the order is approved, a purchase order is automatically generated and sent to Heatleys for fulfillment, all while both parties applications maintain their connections.

PunchOut Benefits

- **A seamless** highly efficient method of transacting for high volume customers.
- **Sophisticated systems** with integrated functionality.
- **Saves time**, money and reduces the need for double entry of purchase orders.
- **Reduces** the need for paper catalogues, manual errors and emails.
- **Automation** enables an efficient transaction execution and prompt, reliable product and service delivery.
- **Improves traceability** and reporting due to integration with IT systems to support data collection, visibility and analysis.

Work Smarter with Heatleys Integration Solutions
