

Access Heatleys Through our Vending Solutions

Heatleys Vending Solutions are a secure way to store and issue safety, PPE and industrial products on-site, ensuring goods are always in close proximity when required.

Vending machines provide a controlled process for issuing products, making inventory management easier, enhancing visibility of consumable usage and waste and ultimately, improving your bottom line.

Features & Benefits

- **24/7 access** to essential items at Point-of-Use.
- **Optimise inventory** management.
- **Reduce inventory costs** by only paying for what you use.
- **Control distribution** thereby managing consumption and wastage.
- **Reduce operational downtime** by situating vending machines in high usage areas.
- **Real time reporting** and automated notification alerts you when items are running low, allowing you to re-stock before running out.
- **Manage user accountability** by requiring ID registration when accessing items from the vending machines.
- **Manage and record** the issuing of safety and PPE products to ensure OHS requirements are met.

Work Smarter with Heatleys Vending Solutions

Security

Low, medium and high security options.

Dispensing

Single or multi-item configurations for consumables.

SAFETY&INDUSTRIAL

What is involved in having Heatleys Vending Solutions set up on-site?

- 1 Get in touch with our Inventory Solution Specialists who can work with you on a proposed inventory range to achieve the solution that best suits your needs.
- 2 We will then develop and implement employee smart cards which can be used to track usages and allocations.
- 3 A reporting system will be set up to monitor and track usage and provide you with real time reporting of stock levels and usages.

What are the cost savings associated with Heatleys Vending Solutions?

- Reduced wastage or overuse of consumables: Vending provides a level of accountability reminding users to be less wasteful in the use of these products.
- Less downtime: Vending allows you to put the machines in remote locations, or high volume locations where the goods are most required. It reduces the downtime of employees walking to/from the stores areas to get the goods and keeps them focused on the tasks at hand.

What items can go in the Vending Machines?

Vending machines are most commonly stocked with PPE and consumable products. However, if you have different requirements, you can stock them accordingly.

Explore our range of Access Solutions

Heatleys' range of Access Solutions have been designed to help you streamline how you get our products.
