

Heatleys' Products & Services On-Site

We can provide a dedicated Heatleys resource to increase on-site presence and make sure you have what you need, when and where you need it.

From identifying products, managing your Stock Hub or store and assisting with inventory management, we'll help you find what you need, when you need it so you can stay focused on the work that matters most.

Features & Benefits:

- **A dedicated resource** frees employee time increasing productivity.
- **Streamline processes** to reduce time spent managing inventory.
- **On-site expertise** to provide support and advice on product selection.
- **Optimised inventory** delivers cost reduction by helping reduce on-hand inventory levels while minimising stockouts.
- **Flexible options** help manage on-site inventory (Heatleys managed or vendor managed).

Customer Managed vs Heatleys Managed Inventory

Customer managed sites are more suited to smaller operations where the customer is responsible for the stocking, issuing and administration of the store.

Heatleys managed sites are well suited to complex high volume contracts or large employee-based site locations where the turnover of safety or industrial consumables is high. The aim of the Heatleys On-site Store is to provide the customer with an in situ based solution that removes the burden on the customers procurement teams to regularly manage high volume ordering of consumable item.

- **Reduce** inventory holding costs.
- **Increase** working capital and increase cash flow by reducing inventory.
- **Pay** for the goods upon issuing.
- **Hold** the right stock in the right quantities for your location.
- **Reduce** the burden on purchasing teams.
- **Implement** real time technology solutions to control the issuing of goods.
- **Receive** real time reporting via Heatleys' state-of-the-art technology.
